Workplace Health and Safety

Health Screener - Employee and Visitor Monitoring

1. Employee or visitor approaches kiosk, motion sensor triggers message to sanitize hands before proceeding to the next step.
2. After sanitizer is dispensed, screen advances to a custom message such as "Swipe Identification Badge" or "Enter Employee Number".
3. After employee identification, message appears to place forehead within 10" of the temperature sensor.
4. If temperature is above normal, a message appears asking employee or visitor to wait for secondary verification. If temperature is normal, screen changes to a welcome message.

TEMPERATURE SENSOR

DEVELOPING SOLUTIONS TO KEEP EMPLOYEES AND THE WORKPLACE HEALTHY AND SAFE.

Leveraging our fifty-plus year history as a US-based technology provider to the point-of-purchase display industry, our team continues the tradition of developing custom products to educate, protect and serve the community. By combining a broad range of sensor technologies with Data Display's video, audio and lighting product line we're able to deliver products that keep employees in the know while protecting the workplace. Coupling this with our Remote Content Management system allows businesses, hospitals, clinics and offices to deliver real-time information.
