SAVE UP TO 20%
ON YOUR CYBER SECURITY INSURANCE

KMRD Partners and COMPASS have partnered with a global leader in cyber insurance to offer clients up to 20% off their cyber insurance premium. 5% discounts are offered following an assessment and an additional 15% subsequent to the remediation of any critical network vulnerabilities. An assessment will allow you to identify critical vulnerabilities within your network, organization, procedures, and policies. Find out how you can significantly improve your organization's security posture, while limiting your liability in the event of a data breach.

THE BENEFITS

- 5% premium policy discount after initial vulnerability assessment
- 15% premium discount after any critical network vulnerabilities are remediated
- Work with an A.M. Best-Rated A, VII carrier. Industry leader in cyber insurance coverage
- Proactively identify and address potential vulnerabilities at a pre-negotiated discounted flat cost

THE FACTS

- The average cost of a US data breach is $5,850,000
- The average cost per stolen record in the US is $201
- The likelihood of a data breach is 22% when you have more than 10,000 records
- In 2014 a total of 15,435 vulnerabilities were identified in 3,870 applications from over 500 vendors.

OPTION 1- $6,250
A complete assessment on each of the key components of cyber security; policies, employees, and technology:

Policy Assessment
- Gap analysis on your existing policies against COMPASS' 36 best practices

Employee Awareness Assessment
- Employee Survey
- Mock-Phishing Exercise

Technical Assessment
- Host Discovery Scan
- Network Vulnerability Scan
- Web Application Vulnerability Scan

OPTION 2- $4,250
This option focuses on 2 of the 3 key components of cyber security; employees and technology. Organizations who select option 2 are still qualified for the same discounts on their insurance premium as outlined above:

Employee Awareness Assessment
- Employee Survey
- Mock-Phishing Exercise

Technical Assessment
- Host Discovery Scan
- Network Vulnerability Scan
- Web Application Vulnerability Scan

.

*Please Note: The technical assessment is limited to 250 hosts
